

contains Duplicate (217)

Make a set using all elements. If size of set is same as the number of elements, then there are no repeat elements -

CODE

```
bool containsDuplicate (vector<int> & v) {  
    set<int> s;  
    for (int x : v) {  
        s.insert(x)  
    }  
if (s.size() == v.size()) {  
    return false;  
}  
return true;  
    return ! (s.size() == v.size());  
}
```
